Projects

turtleDB | Co-Creator and Software Engineer | 2018 - Present | Remote

- Built a developer-friendly, promise-based wrapper for the in-browser storage API IndexedDB.
 - Implemented an efficient two-way sync protocol between clients and a back-end server using HTTP to share database changes.
 - Built a back-end server and database adapter for MongoDB to facilitate the sync protocol.
 - Developed a unique data structure to implement document versioning, and accompanying algorithms to efficiently traverse trees, merge trees, and resolve version conflicts.
 - Created a front-end testing and diagnostic dashboard using React to speed up the development process.
 - Featured in [Hackernoon](#) and [JavaScript Weekly](#) publications.
